Quality Design Plus Functionality

Metro Steel Services

We are a leading WA provider of outdoor BBQ areas.

We pride ourselves on the highest quality and calibre of craftsmanship, we work with residential and commercial clients to design, construct and install exceptional stainless steel alfresco areas.

We understand that in our beautiful Perth climate, a stunning alfresco space is a must for any Western Australian home.

We can work with you personally, your interior designer, or your home builder, to create a perfect outdoor kitchen to complement your space, whilst in the process adding value to your home.

The Metro Steel Difference

Custom made locally in WA by qualified tradespeople

- **Stronger and more durable stainless steel structural frame work**, as opposed to current industry standard galvanised frame work
- **Extra strength double skinned and welded doors**, no nasty rivets used
- **Durable full stainless steel draw construction** including runners
- Built to a **commercial standard** with a domestic high end finish
- **10 year warranty** on structural frame and stainless benchtops
- Choice of stainless steel, granite and engineered stone and wood tops
- **Concealed catches behind doors**, no bulky plastic magnets used
- **Easy clean** handle free doors
- **Installation by our fully qualified tradespeople** (we don't use subcontractors)
- Clean and tidy: our tradespeople will clean up all material and mess made while on site
- **Full 316 grade** (marine grade) stainless steel construction

Extra strength double skinned doors

Durable full stainless steel draw construction including runners

Example of 304 grade materials used in the wrong application instead of 316 grade. Don't make a wrong decision and find out when its too late.

All our quotes come with a 3D rendered image of the proposed design.

5 Steps to Creating Your Ultimate BBQ Entertaining Area

1. Size of unit or space you have available

- We can custom make BBQ areas to any size you require.

2. Choice of Benchtop – Engineered stone, granite or stainless steel

- Stone and granite is great to break up the stainless steel cabinets or match your current kitchen. However is not recommended if it is in direct sunlight or weather elements.
- Stainless steel is a product that can outlast any of the Aussie elements.

3. Choice of BBQ Accessories

- Metro Steel Services is a proud supplier of Beefeater, Electrolux, Blanco, Omega, Heatlie and Everdure. We have BBQs, fridges, rangehoods to suit every budget and style.

4. Do you want to be able to wash up in your Alfresco and not have to carry all the dirty dishes back into the house?

- Metro Steel Services can design and include in your BBQ any type of sink you like, from custom integrated stainless steel underslung sinks in granite or stainless tops and also insert sinks.

NOTE: Please make sure that your designated area has water and drains already or that they are able to be installed in the area that you wish to have the BBQ area.

5. Finishing Touches

- Being predominantly a metal fabrication shop, we can also finish off anything else you require to complete and tie in your outdoor area from dining tables and chairs to screens, bench seats, planter boxes, gates or even fencing.

Our only
limitation is your
imagination

Alfresco fridges

We stock a range of alfresco refrigerators including Beefeater, Everdure and Rhino.

BBQs

Metro Steel Services are proud to be the distributors for the following leading brands of BBQs

Accessories

Metro Steel Services can help you choose appliances and accessories to suit your needs.

Rangehoods

Classified enclosed areas require the barbecue to have an exhaust hood, we have standard sizes or we can custom make one to suit your individual requirements.

Wall mounted ovens and microwaves

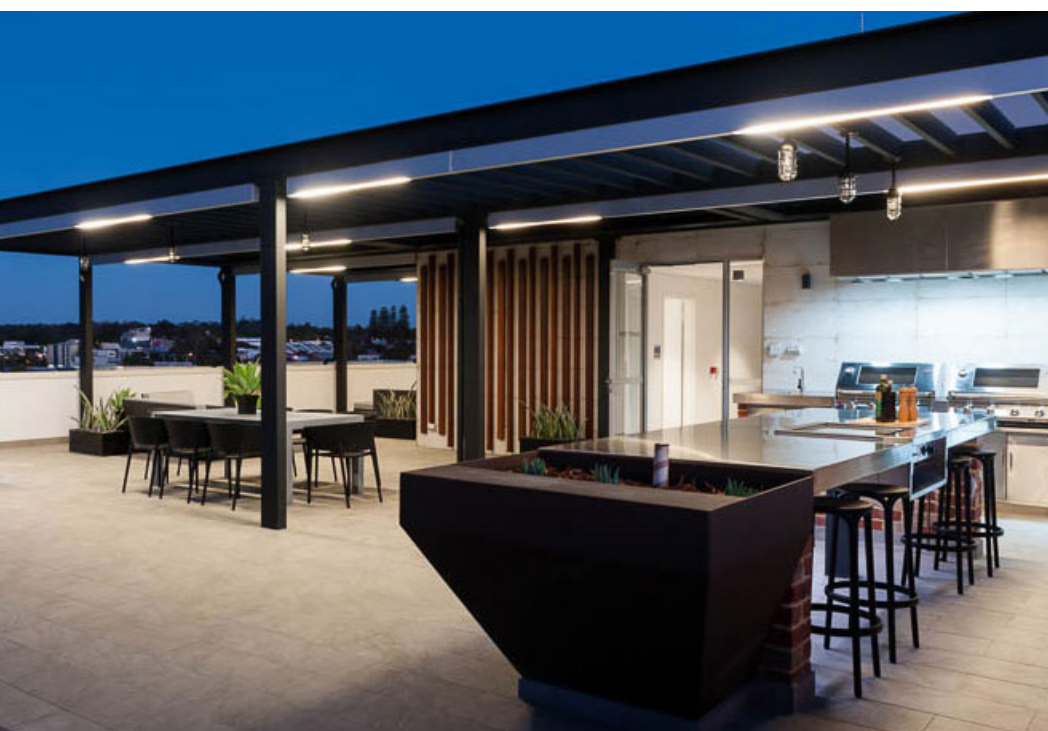

Sinks
